

ReactJs Assessment Test 3

Build Accordion in React

Creating an accordion that toggles text content on click of the accordion header using React State and conditional rendering.

The following are the steps to create an accordion in React JS:

1. Display every title of accordion with body.
2. Hide every accordion body using **element.display = none;**
3. Toggle visibility of accordion body on click of title.

Make sure business logic is denoted with appropriate comments and make your code interactive and represent clean and clear output on your console screen.
